Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group 1, claim(s) 30-32 and 46-49, is drawn to secure user authentication in a telecommunication core network via a gateway connection to a WLAN.

Group 2, claim(s) 33-36, is drawn to a session manager with means to create a master session that comprises the user's identifier and the received first user's shared key.

Group 3, claim(s) 37-45, is drawn to an access control for already authenticated users during active session via a service access authentication node based on matching keys.

Group 4, claim(s) 50-58, is drawn to secure authentication in a telecommunication core network via an entity and creating a master session.

The inventions listed as Groups 1-4 do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Group 1 has the secure user authentication in a telecommunication core network via a gateway connection to a WLAN as its special technical feature.

Group 2 has a session manager with means to create a master session that comprises the user's identifier and the received first user's shared key as its special technical feature.

Group 3 has an access control for already authenticated users during active session via a service access authentication node based on matching keys as its special technical feature.

Group 4 has secure authentication in a telecommunication core network via an entity and creating a master session as its special technical feature.

There is unity of the invention between groups 1 and 4 and between groups 2 and 4. There is a lack of unity of the invention between groups 1 and 2, 1 and 3, 2 and 3, and 3 and 4 because there is no common special technical feature. Sending and receiving user's shared keys is common general knowledge, which is, e.g., known from the exchange of symmetric content encryption/decryption keys between content owner and content user in data networks.

Conclusion

A telephone call was made to the attorney of record, Andre Gibbs on 10/23/08 to request an oral election to the above restriction requirement, but Mr. Gibbs requested a mailed action to consider the restriction.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does

not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to MICHAEL R. VAUGHAN whose telephone number is (571)270-7316. The examiner can normally be reached on Monday - Thursday, 7:30am - 5:00pm, EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kim Vu can be reached on 571-272-3859. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
